## ABOUT ME

Third-year Digital Technology student and aspiring Web Developer who merges technical 'science' with creative 'art'. Skilled in Frontend (React, HTML/CSS/JS) and Backend (.NET Framework). A fast learner, highly adaptable, and dedicated to supporting the team for project success.

## EDUCATION

**Institute of Digital Art and Science**  
Suranaree University of Technology  
2023 - Present

**High School**  
Kaeng Khro Wittaya School  
2017 - 2023

## SKILLS

- .NET Framework
- React
- Swift
- Java
- C++
- C
- HTML / CSS / JS
- Fast Learner
- Teamwork

## EXPERIENCE

### Digitech Hackathon | 2025 (Developer Backend)

- Developed "Korat Farm," a proof-of-concept farm management application for the "Korat Smart City" challenge.
- Gained intensive experience in high-pressure problem-solving and rapid prototyping under extremely tight deadlines.
- Collaborated in a multidisciplinary team to brainstorm, build, and adapt solutions to a real-world problem.

### SkillEx Platform | 2025 (Developer Backend)

- Developed the backend for "SkillEx Platform," a mini-project designed as a skill-exchange platform, using the .NET Framework.
- Gained initial experience in AI implementation by integrating a foundational AI component into the project for the first time.
- Designed and built the core APIs to support the platform's user and skill-matching features.

### RestApp IOS Application | 2024 (Developer Backend)

- Developed "RestApp," an iOS application designed to manage dormitory operations and utility bill notifications.
- Designed and implemented the data model and business logic for handling complex information (e.g., resident data, room status, and billing).
- Independently learned and applied the Swift programming language, demonstrating the ability to quickly master new technologies for a project.
